

Corporate and Continuing Education

Schedule of Courses

Spring Semester 2010

Corporate and Continuing Education Course Offerings

Occupational Training

"Workforce Preparedness for Today and Tomorrow"

"Hope, Opportunity and Jobs"

Occupational Training courses provide opportunities for citizens to prepare for new occupations or upgrade their knowledge and skill in their current employment. The opportunities are provided through single courses or a series of courses specifically designed for an occupation. The courses are offered in technical or vocational occupations and vary in length according to the complexity of the skill and the need of the employee or employer. Occupational courses can be developed upon request for a group or an employer and taught at a time and place convenient to those requesting instruction. Through these program areas, certification, recertification, and short-term skills training are provided.

A variety of courses are provided for the professional development of individuals who need additional skills, upgraded skills, or new skills in these areas. Although degrees are not awarded for completion of continuing education courses, certificates are provided and students may become certified or may be prepared for testing and certification, i.e. state certification or apprenticeship programs. Courses include, but are not limited to, the following:

Certification and Licensure

EPA Refrigerant Recovery/Recycling Certification

This 14-hour course is designed to aid technicians in preparing to take the CFC recovery/recycling certification examination. The certification examination will be offered as a part of this course and forwarded to the NC Board of Refrigeration Examiners.

AHR-3128		Sat	8:30am-4:30pm	TBD	H bldg	Turner	\$65
----------	--	-----	---------------	-----	--------	--------	------

Escort Driver Certification

This 8-hour course satisfies the requirements set by the NCDOT to certify oversized - overweight load escort vehicle drivers. Defensive driving, escort driver requirements, skills training, and an examination are components of the course. The NCDOT will issue a certificate for those completing the course and scoring 75% or higher on the end of course examination.

AUT-3003		Sat	8:00am-5:00pm	TBD	H bldg	Moose	\$65
----------	--	-----	---------------	-----	--------	-------	------

Escort Driver Re-Certification

This 4-hour course satisfies the requirements set by the NCDOT to re-certify oversized - overweight load escort vehicle drivers.

AUT-7200		Sat	8:00am-12:00pm	TBD	H bldg	Moose	\$65
----------	--	-----	----------------	-----	--------	-------	------

Motor Vehicle Independent Dealer License-Renewal

The 6-hour training required for renewal of the motor vehicle independent dealer license is satisfied by successful completion of this course. A variety of topics are covered with a minimum of two hours of training being devoted to current Department of Motor Vehicles issues. Positive identification is required to receive credit for attending the course.

Teacher Renewal

All courses listed under the Teacher Renewal section may be taken for teacher renewal credit. If you are currently teaching, you must obtain approval through your local education agency (LEA). If you are not currently teaching, the course must be related to your area of certification. If you have additional questions regarding teacher renewal credit, you may check with the Department of Public Instruction (DPI). All Ed2Go courses may be approved for teacher renewal credit based upon the same criteria listed above.

***All beginning computer classes of 10 or more hours are approved for Teacher Renewal Credit.**

Health Services

The Health Information Management Institute (HIMI)

The Health Information Management Institute (HIMI) is designed for individuals seeking a career in the medical office environment and also for those already employed wanting to expand their current knowledge base. The courses offered in the institute teach a variety of technical and cognitive skills, all of which are essential to the successful medical office worker.

The foundation of the HIM Institute consists of three core courses, Anatomy and Physiology, Medical Terminology, and Disease Processes. After successful completion of these core courses, students may choose from the following, based upon their own career path: Medical Coding, Medical Billing, Medical Transcription, HIPAA Laws, Records Management, Legal Aspects of Medical Records, and Quality in Health Care. Most of the courses taught in the institute are hybrid.

Medical Terminology	ONLINE	ONLINE	TBD	Middleton	120

MASSAGE THERAPY - WATAUGA CAMPUS

This 600-hour five (5) course series is divided into three semesters and is designed to prepare the student for the certification examination required for the North Carolina licensure application process. Through class work and practical "hands-on" training, students obtain a solid foundation for professional practice as an entry level Massage Therapist. Upon successful completion of the course, the student is eligible to sit for the certification exam and apply for state licensure in North Carolina.

Semester I is offered beginning each fall semester. Modules include: Anatomy and Physiology I, Body Mechanics, Chair Massage, Communication, CPR, Documentation and Assessment, Hygiene and Standard Precautions, Indications and Contraindications, Kinesiology, NC Board meeting, NC Laws and Regulations, Special Populations, Student Clinics, Swedish Massage, Wellness and Self Care.

Semester II is offered beginning each spring semester. Modules include: Anatomy and Physiology II, Active Isolated Stretching, Business, Ethics, Four Handed Massage, Hydrotherapy, Joint Mobility, Oriental Theory, Orthopedic Assessment, Sports Massage and Student Clinics.

Semester III is offered beginning each summer semester. Modules include: Chakras, Deep Tissue Massage, Infant Massage, Certification Exam Prep, Pathophysiology, Prenatal Massage, Reflexology, Somatic Psychology, Spa Tour, Stone Massage and Student Clinics.

Note: Massage Therapy Semesters I, II, and III are sequenced courses. Students are admitted fall semester only.

Admission Requirements:

- Must be 18 years of age
- High School Diploma or GED
- No felony convictions
- Placement test. A reading test is required for entrance into the course. Test is waived if the student shows proof of a post secondary degree.
- Attend mandatory orientation session
- Interview with Massage Therapy Coordinator
- Completed admission packet

Medical Billing and Coding

This is an introductory course designed to familiarize students with insurance programs and federal health care regulations as well as provide basic knowledge of ICD-9 and CPT codes. Students will cover topics related to both the physicians' office and hospital coding. Course topics include an introduction to CPT, evaluation/management services, anesthesia/surgery, radiology and pathology/laboratory, medicine, ICD-9-CM introduction, ICD-9-CM guidelines and third-party reimbursements, and managed care. Other topics include surgery coding, outpatient coding, procedure coding, diagnosis coding, anatomy, and UB-92 claim forms.

Admission Requirements:

- Medical Terminology course

				TBD			
--	--	--	--	-----	--	--	--

Medical Terminology

This 30-hour course is an introduction to the study of the structure of medical words and terms. Emphasis is placed upon spelling and defining commonly used prefixes, suffixes, root words, and their combining forms. Program content covers basic human anatomy and physiology, elements of medical terminology and names of major diseases, including terms used in physical exams, operative procedures and diagnosis. Students receive a certificate upon successful completion of this course.

Admission Requirements:

- Completion of a minor permission form for students 16-18 years of age

Nurse Aide Level I

This 160-hour course prepares students to provide personal care and perform basic nursing skills for the elderly and other adults. Emphasis is placed upon the aging process. Topics covered include safety, restorative care, personal and functional diseases/disorders, communication, patient's rights, nutrition management and elimination. In addition, CPR instruction, competency and certification are included in the course curriculum. Students are required to successfully complete all segments of the course including classroom, lab, and clinical hours in order to receive a certificate of course completion.

The student must also successfully pass a two-part written and skills state administered examination, in order to satisfy requirements imposed by the Division of Health Service Regulation to become listed as a Nurse Aide I in North Carolina. Upon successfully completing both course work and state exam, the student will then be listed on the North Carolina Nurse Aide I Registry.

Admission Requirements:

- Placement test. A reading placement test is required for entrance into the course. Test is waived if the student shows proof of a post secondary degree
- Completion of a minor permission form for students 16-18 years of age

Nurse Aide Level II

This 192-hour two-part course prepares students to perform more complex nursing skills than those required for Nurse Aide I. The first segment of the course includes 100 hours of classroom instruction with lab practice. Curriculum focus is on infection control, oropharyngeal suctioning, established tracheostomy care, observation and maintenance of oxygen therapy, enteral nutrition, and Nursing Assistant II roles with members of a health care team. The second segment of the course involves 92 hours of clinical learning experience in various health care settings. Students will demonstrate proficiency of knowledge and skills learned through interactions with patients and residents while in the clinical setting. A comprehensive written and skills evaluation is administered to confirm student competency for completion of this two-part course. Students are then eligible to apply for listing as a Nurse Aide II in North Carolina through the Board of Nursing.

Admission Requirements:

- Proof of completion of a minimum 75-hour state approved Nurse Aide I course
- Current listing with the Division of Health Service Regulation as a Nurse Aide I
- High School Diploma or GED
- Placement test. A reading placement test is required for entrance into the course. Test is waived if the student shows proof of a post secondary degree

Nurse Aide Refresher

This 20-hour course provides the individual with an expired Nurse Aide I listing an opportunity to update and refresh his/her knowledge of personal care and basic nursing skills needed for elderly patients to become re-listed in North Carolina. The course also allows out of state individuals the opportunity for initial listing in North Carolina.

Once the student successfully completes the course and receives the Certificate of Course Completion, he/she is eligible to apply and sit for the two-part written and skills state examination required effective July 1, 2006.

The student will be listed as a Nurse Aide I with the State of North Carolina as required by the Division of Health Service Regulation upon successfully passing the state examination.

Admission Requirements:

- Proof of completion of a minimum 75-hour state approved Nurse Aide I course.

Pharmacy Technician

Pharmacy Technician is a 90 hour course designed for individuals who are trained to work under the supervision of a pharmacist in a pharmacy/hospital setting. Course work provides the student with basic essential knowledge and skills required to work as a technician in the pharmacy.

Material taught in this course includes: reading and interpretation of prescriptions, computer entry, drug classification, federal and state laws and regulations, medical terminology, calculations, drug dosage and activity, drug routes and forms, compounding, and preparation of IV admixtures. Anatomy and physiology is also included in this course as it relates to disease, with emphasis on drug therapy.

----------	-----	----	-------------	-----------------	------	---------	-------

Phlebotomy

This 160-hour two-part course prepares students to draw blood specimens from patients/clients for analysis. The first part of the course includes 120 hours of classroom instruction with extensive lab practice. Curriculum focus is on basic anatomy and physiology; proper selection/collection of blood specimens via capillaries and veins; proper techniques for care of blood specimens; use and maintenance of laboratory equipment; appropriate interpersonal communication skills with patients/clients and healthcare team members; data entry and associated clerical duties for accurate record keeping. Instructor demonstration of proper technique and student return demonstration is a key component of this course. Students participating in this course must interact with classmates by giving and receiving actual blood specimens. CPR instruction, competency and certification are also included in the course curriculum. A comprehensive written evaluation and mock competency is administered to confirm student competency at the end of the first course. The second part of the course requires 40 consecutive hours of clinical rotation in an assigned venue, wherein the student will demonstrate proficiency of knowledge and skills acquired, through interactions with patients/clients. Upon successful completion of this two-part course, the student will receive a course certificate and is prepared to sit for a national examination, to become a certified Phlebotomist.

Admission Requirements:

- High School Diploma or GED
- Must be 18 years of age

Institute of Sustainable Technology**Green 101 - Small Business**

This course addresses simple methods to reduce energy consumption, reduce waste and improve the bottom-line by becoming more environmentally conscious in the small business work environment. Students learn about aspects of "Going Green" they might not have considered before such as the importance of local sourcing and how it impacts small businesses and the environment. Course addresses areas to include self analysis of business in energy use or carbon footprint, water reduction methods, energy efficiency, green transportation, supporting local business and heritage, and how to effectively market your business once you adopt these sustainable methods. This course is offered online.

			On line	Upon Demand			
--	--	--	---------	-------------	--	--	--

Sustainable Development

Students will study the development which ensures the well-being of the human race by understanding and integrating a triple bottom line of social development, economic development, and environmental conservation and protection as the foundation of sustainability. Students will learn about the history, methods, vocabulary and real world practices associated with sustainable development.

				TBD			
--	--	--	--	-----	--	--	--

Renewable Energy Overview

In this course, students learn about renewable energy sources such as photovoltaic, solar thermal, wind, micro-hydro, geothermal, and bio-fuels. Each class is geared toward a specific renewable energy source. The classes give students an in-depth look at how each of the energy sources can benefit students and/or their clients

		Sat	9:00am-12:00pm	TBD			
--	--	-----	----------------	-----	--	--	--

Emerging Trends in High Performance Building

This course is for those who want to learn more about high performance building. The course covers air and heat flow, proper insulating techniques, moisture control, and crawl spaces. Students also learn about testing methods using instruments such as the blower door, duct blaster, thermal cameras, and carbon monoxide testers. The students learn how to become a Certified Green builder and explore different building programs that fit any building trade.

		M	3:00-5:00pm	TBD			
--	--	---	-------------	-----	--	--	--

Introduction to Building Science

This course provides students with the skills necessary to create an indoor environment that is healthy, comfortable, durable, and energy efficient. Students gain an understanding of the complex relationships between occupant, building, machines, and nature. Students acquire a basic understanding of how to achieve a better building envelope for either residential or commercial applications.

				TBD			
--	--	--	--	-----	--	--	--

Water Management and Green Landscape Design

This course introduces students to ways to deal with water in a holistic fashion, taking into account the various sectors affecting water use, including political, economic, social, technological and environmental considerations. The course also deals with integrating these ideas with landscaping practices which promote native plant growth along with proper plant location management. Students identify simple ways to incorporate these sustainable practices at home or work that make a positive impact.

				TBD			
--	--	--	--	-----	--	--	--

Building Performance Institute

The Building Performance Institute (BPI) is a nationally-recognized training program that enables students to become the type of builder necessary for the future. BPI works with building performance industry stakeholders to ensure the professional measure for

excellence in building performance contracting is established and maintained by creating and regularly updating technical requirements through an open, transparent, consensus-based development process. Please visit www.bpi.org to learn more about BPI.

		M-F	8:00am-5:00pm	TBD			
--	--	-----	---------------	-----	--	--	--

Building Operators Certificate (BOC)

Students are provided information and an understanding of energy efficiency guidelines for building operators (e.g., maintenance personnel at hospitals, schools, industrial sites or other large scale utility customers). This training and certification program for building operators is nationally recognized.

		T	8:00am-5:00pm	TBD	Civic Center		TBD
--	--	---	---------------	-----	--------------	--	-----

Advanced HVAC Technology

This course is designed to introduce the HVAC professional to the most current design and installation techniques, materials, and performance testing equipment; intended to enhance efficiency for any given building envelope.

				TBD			
--	--	--	--	-----	--	--	--

Advanced Plumbing Technology

This course introduces the plumbing professional to the most current design and installation techniques, materials, and performance testing equipment; intended to enhance energy efficiency for any given building envelope. The course also introduces the plumbing professional to the world of hydronic heating and cooling systems especially with respect to solar thermal technology and high efficiency boiler systems.

				TBD			
--	--	--	--	-----	--	--	--

Fundamentals of Photovoltaic Technology

This course provides an in-depth view into the technology, applications, and considerations associated with photovoltaic systems. Learn about site assessment, placement, installation, wiring, safety and other key aspects of PV technology. Students are prepared to sit for the NABCEP certification exam upon completion of this course.

				TBD			
--	--	--	--	-----	--	--	--

Introduction to Solar Thermal Technology

This course provides an in-depth view into the technology, applications and considerations associated with solar thermal systems. Learn about one of the most affordable and cost effective renewable energy sources. Students who complete the course are prepared to sit for the NABCEP certification exam.

EGY-7010				TBD			
----------	--	--	--	-----	--	--	--

Advanced Electrical

This course introduces the electrical professional to the most current design and installation techniques, materials, and performance testing equipment; intended to enhance energy efficiency for any given building envelope. This course also introduces the electrical professional to lighting systems integrated with day lighting, the importance of a systematic understanding of ventilation, integrated heating and cooling systems

especially with respect to solar thermal, photovoltaic, and high efficiency boiler and furnace systems.

				TBD			
--	--	--	--	-----	--	--	--

Introduction to Sustainable Design

This course introduces concepts and principles related to sustainable site development and architectural design. Topics include low impact and sustainable site development, water efficiency, energy efficiency, material and resource management, indoor environmental quality, and return on investment. Upon completion, students are able to articulate and integrate sustainable design principles into site and architectural design.

				TBD			
--	--	--	--	-----	--	--	--

Junk to Funk - Sculpting with Recycled Materials

This sculpture course shows students the artistic side of sustainability. Students learn how to communicate a message of sustainability through artistic expressions with varied media, many of which can be gathered as recyclable/reusable items.

				TBD			
--	--	--	--	-----	--	--	--

Green Small Business Seminars

Human Resources Development Program

Since 1973, Human Resources Development (HRD) has been offering a variety of courses to educate and train adults for workplace success. Courses vary from Computers in the World of Work to Employment Connections.

HRD courses are available to individuals who are unemployed, underemployed, seeking to make a job change, or seeking to gain basic job maintenance skills. All classes are offered at no cost to those who qualify. Others may also take HRD Courses but must pay a registration fee.

Employment Connections

Employment Connections is designed for dislocated workers, the unemployed, those who want to seek a new job or start a new career. This course is designed to assist students in preparing for a more detailed job search.

Employment Connections topics include:

- Exploring career options
- Learning to job search
- Completing job applications
- Preparing a resume
- Practicing interviewing skills
- Answering tough interview questions
- Dressing for an interview
- Building relationships in the workplace
- Communicating effectively

HRD-7021		MW		TBD				\$65
----------	--	----	--	-----	--	--	--	------

Computers in the World of Work

This introductory course is designed for those individuals who have minimal or no computer skills. Course objectives are to:

- Provide basic computer skills to increase employability skills
- Emphasize the role of information technology in the world of work
- Generate enthusiasm for computer technology
- Create a desire to obtain additional computer skills

Students receive hands-on computer experience and individual instruction.

Career Exploration 101

This 80-hour online course is designed to help students learn more about themselves, their interests, skills and abilities. The information gained from the first unit will guide students through the rest of the course to help prepare them for their job search, through resume writing, applications and interviews. It will also help prepare them for the work environment by showing them what employers expect and how to deal with other people in a constructive way.

Ed2Go classes begin on the following dates for spring semester: 1/20, 2/17, 3/17, 4/21, & 5/19.

Small Business Center

"The First Step to Your Business Success"

The Small Business Center is designed to meet the training needs of the area's small business owners, managers, and other personnel, as well as entrepreneurs planning to start a small business. Training sessions are offered as workshops, seminars, and short-term courses. The Small Business Center also offers confidential business counseling at no cost and has a resource center with publications and other research materials to help with small business research and problem solving. To schedule an appointment with the Small Business Center, please call 828-726-2242.

Small Business Start-up Series: Consists of a series of five seminars. The seminars are How to Start a Business, How to Write a Business Plan, Financing a Small Business, Record Keeping, and Marketing a Small Business. Participants will gain the fundamental knowledge of how to get started with their very own business venture.

Caldwell

Starting a Small Business Learn the basic steps for starting a business. Find out about permits and licenses, forms of ownership, sources of capital, taxes, insurance, and other topics of interest.	Th	6:00-8:00pm		\$0
Developing a Small Business Plan There are two main parts to a plan: the narrative (which describes your business) and the financial information. Discover how easy it is to create an effective plan for your business idea.	Th	6:00-8:00pm		\$0

General Interest

Basic Rider Safety Program

This 22-hr course is designed for the student with little or no motorcycle riding experience. Upon successful completion of the safety and street skills course, students are given completion cards to take to their local DMV office. Upon successful completion of the written examination at the DMV office, students will receive a motorcycle endorsement on their driver's license. Motorcycles are provided by the college, however the student is responsible for the protective gear required to participate in this course. Courses are held March-November each year.

***Call 828-726-2242 for registration instructions and information.**

Alive at 25! Defensive Driving Course

This course goes hand in hand with the defensive driving program; however, this young driver intervention program zeroes in on drivers between the ages of 16 and 24 – the group most likely to be involved in fatal collisions. This highly interactive four-hour course teaches young drivers how to take control of situations by taking responsibility for their own driving behavior.

Defensive Driving Course

Those charged with certain traffic violations, such as speeding, unsafe movement, etc., in any county that recognizes the NC Safety and Health Council program may have their charges reduced by the District Attorney by taking this 4-hour course. Violations will be reduced to improper equipment and points will not appear on your driver's license or your insurance. The course is offered weekly.

General Information

Corporate and Continuing Education courses are offered at all college facilities in both Caldwell and Watauga Counties. Courses are also held off site.

Admissions

Admission to open to individuals 18 years of age or individuals whose regular high school class has graduated. A Minor Permission Form is required for those between 16 and 18 years of age.

Fees

Registration fees are required for occupational training and self supporting courses. Textbooks or special materials may be purchased from the campus bookstore. Occupational training courses are offered at no cost to North Carolina residents 65 year of age and older, up to a maximum of 96 contact hours per semester. Additional fees may be charged in certain courses.

To Enroll

Registration dates may be found in the front of the college catalog under Academic Calendar. Semester schedules are available on the college website www.cccti.edu or a printed copy is available up request to the Corporate and Continuing Education Department. The college reserves the right to cancel any course when insufficient numbers are

registered. Applicants are admitted on a first come, first served basis. Students may register any Tuesday from 8 am - 7 pm at the Corporate and Continuing Education Office on either campus and at the first class session if space is available. Parking stickers and student IDs are available on regular registration days. See Academic Calendar for current registration dates and holidays.

Refund Policy

Students registered for an occupational training course who officially withdraw prior to the first day of class will be eligible for a 100 percent refund, if requested. Students who officially withdraw on the first day of class or by the 10 percent date of the class will be eligible for a 75 percent refund, if requested. (Students enrolled in a multi-entry/multi-exit class who officially withdraw on the first day of class or within 10 calendar days of the first class meeting are eligible for a 75 percent refund, if requested). Students registered for an occupational training course that is canceled for any reason by the vice-president will automatically be issued a 100 percent refund. To receive a refund, a student must complete and sign a continuing education drop/refund form and have the vice-president sign for the course(s) being dropped.

Course Repetition Policy - Occupational Extension

No occupational extension training course may be taken more than twice within a five-year period unless the student pays full cost of the course. The occupational extension repeat policy does not apply to students taking course(s) for certification, licensure, or recertification.

Attendance/Grading System

A course syllabus will be distributed by the instructor to include attendance policies at the beginning of each course. Students will be held responsible for understanding all attendance and classroom rules issued by the instructor. Numerical and/or letter grades will be given for occupational training classes requiring certification. All other continuing education grades will be recorded as follows:

A	Excellent	S	Satisfactory
B	Above Average	U	Unsatisfactory
C	Average	W	Withdrawn
D	Below Average		
F	Failing		

Student Records/Transcripts

Student records and transcripts can be reviewed by students for accuracy and may be picked up in person by presenting a signed request in the Student Services office. Certificates are given for the satisfactory completion of occupational training courses. CCC& TI adheres to the Family Privacy Rights Act and assures all students that their records will remain confidential. The college has the right to release information which may include the following:

- student's name
- date of birth
- address
- telephone number
- dates of attendance

Rules and Regulations

All the rules and regulations of the college under "Student Conduct and Responsibilities" will be adhered to by Corporate and Continuing Education students.
